PROJECT HANDELED @ TO THE NEW

Mar 2022 – Current

Project # 9 : Frontend and Backend API Automation using JS/Python and WDIO Framework.

Client : KATCH Media

Team size : 30

Environment : Windows 10, MacBook, Android, iOS

Tools : VS Code, Postman, Node JS, JavaScript, Python Jenkins, etc...

Description : Digital Media platform application

Responsibilities:

- Understand client requirements.
- Develop Automation framework using JS/Python, WDIO, and Postman.
- Create Automation Test scripts and execute on various platform
- Deliver a robust automation framework for e2e, regression & Integration testing

PROJECT HANDELED @ Publicis Sapient

July 2021 – Feb 2022

Project # 8 : API Automation using Node JS and Jest Framework.

Client : Optum Specialty Fusion Engine

Team size : 40

Environment : Windows 10, MacBook, Android, iOS

Tools : VS Code, Postman, Node JS, JavaScript, Azure Work Space, etc...

Description : It was a backend test automation framework for health domain application

Responsibilities:

- Understand client requirements.
- Develop test framework using Node JS, Jest, Azure Portal and Postman.
- Create Automation Test scripts.
- Execution of test scripts on different environments.

PROJECT HANDELED @ mVerve

June 2019 – July 2021

Project # 7 : Page Object Model Using Selenium Webdriver. (Web, Android, iOS Application)**Client** : Elevatoz Brand Loyalty**Tools** : Java, Appium, Selenium Webdriver, TestNG and Auto IT.**Description** : It was a test automation framework for handling the execution of test requirements.**Responsibilities:**

- Understand client requirements.
- Develop test framework using Selenium Webdriver.
- Create Automation Test scripts.
- Execution of test scripts using MAVEN scripts.

Project # 6 : Hybrid Framework (Web, Android, iOS Application)**Client** : Yashoda Hospital (Health Management)**Used Tools** : Sencha Test, Selenium, Jasmine framework.**Description** : It was an end-to-end test suite developed for the automation of different Test scenarios.**Responsibilities:**

- Understand client requirements.
- Develop test framework using Sencha and Selenium WebDriver.
- Create Automation Test Scripts.
- Execution of test scripts using Sencha Test.

Project # 5 : Hybrid Framework (Web & Mobile Application)**Client** : Termax Manufacturing & Engineering**Used Tools** : Manual & Automation Testing**Description** : This product was mainly developed for Quotation and Delivery of their products.**Responsibilities:**

- Understand client requirements.
- Develop test framework using TestNG and Selenium Webdriver.
- Create Automation Test Scripts.
- Execution of test scripts using TestNG.

Project # 4 : Hybrid Framework (Android, iOS Application)**Client** : Pro Spot**Used Tools** : Sencha Test, Selenium Webdriver, Jasmine Framework and other**Description** : Pro Spot provides on-going training to all of their distributors and their technicians.**Responsibilities:**

- Understand client requirements.
- Develop test framework using TestNG and Selenium Webdriver.
- Create Automation Test Scripts on required scenarios.
- Execution of test scripts using TestNG.

Project # 3 : Hybrid Framework (Android, iOS and Web Application)

Client : Guidesly (Boston, USA)

Description : It's an application for Fishing and tourisms can book their schedules and the help of guide.

Responsibilities:

- Understand client requirements and creating test plan and strategy.
- Testing on different platforms with performance.
- Writing Test scripts and execution of them and provide the quality.

PROJECT HANDELED @ Softfeat Technologies

April 2018 – May 2019

Project # 2 : Page Object Model Using Selenium Webdriver. (Web Application)

Client : Online College System

Tools : Java, Selenium WebDriver, TestNG and Auto IT.

Description : It was a test automation framework for handling the execution of test requirements.

Responsibilities:

- Understand customer requirements.
- Develop test framework using Selenium Webdriver.
- Create Automation Test scripts.
- Execution of test scripts using MAVEN scripts.

Project # 1 : Manual Testing (Desktop Application). e-College

Client : All Schools and colleges to automate and reducing human efforts, etc.

Used Tools : Manual Testing concepts

Description : It was a Desktop Application for College and Schools Management system

Responsibilities:

- Understand customer requirements on ground.
- Design a test scenario and test cases using user perspective.
- Execution of tests using Manual Concepts.

DECLARATION

- I hereby declare that the above information is true to the best of my knowledge and belief.

MAHESH S. WANKHEDE
